TIM WHITEMAN

LIGHTING RANGE

PROTEA

TIM WHITEMAN

Designer Tim Whiteman has just introduced PROTEA – a striking new lighting design range. Operating from the Midland Atelier Whiteman has reconnected with his family’s pioneering family history in the Midland Region. Many of his pieces “tell a story” referencing his life in Western Australia and featuring landscape influences.

With almost two decades of design experience, Tim’s work is influenced by graphics, unique forms and an eye-catching use of colour. He is intrigued by the repetition of shapes, creating layers, links and patterns.

With Protea Whiteman explores both form and function.

Protea 1 the first of the series can be assembled in a variety of configurations and is available in both laminated European Beech timber and 100% recyclable Polypropylene in a stunning collection of vibrant colours both solid and transparent. Protea 1 comes in a variety of sizes to suit both domestic and commercial applications.

Each timber light is created using a unique lamination technique, which enhances the organic properties of its renewable material. Protea 1 uses an energy saving bulb, further promoting sustainability with low energy consumption and longer life. The pendant arrives flat-packed ready for easy assembly and installation.

Protea 1 is more art than light fixture, stunning whether displayed solo or in groupings.
